

Welcome to the Podkarpackie Province

eTwinning project 2021
Welcome to Poland, Welcome to Europe

Welcome to the
Podkarpackie tour!

You will see lots of
interesting places to visit.

We invite you to watch the
presentation!!

Martyna Borkowska :)

Martyna Bzdoń :)

Primary School in Piskorowice

Carpathian Troy

The museum complex is located in Trzcinica. The open-air museum houses the oldest known defensive settlements in Poland.

There have been archaeological discoveries dating back to the early Bronze Age and the early Middle Ages. The originator of the project to build an open-air museum in Trzcinica is Jan Gancarski.

Castle in Krasiczyn

Built at the turn of the 16th and 17th centuries.

The construction of the castle was started by Stanisław Krasicki.

There is a garden with a barbecue area on the premises of this building that can also be arranged during a wedding party.

The castle is surrounded by a park.

From April 20 2018, it has the status of a Historical Monument.

The Waterfall in Olszanka in Uherce Mineralne

A wide waterfall cascading over mossy rocks in a lush forest. The water flows from the left towards the right, creating multiple small cascades over large, dark rocks. The surrounding area is filled with dense green trees and foliage, creating a vibrant, natural setting. The water appears clear and fresh, with some white foam visible as it falls.

The waterfall in Olszanka is considered the widest in the whole region. This natural step, measured from one bank to the other, is 38 meters long.

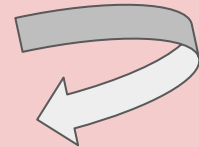

The waterfall is considered a monument of inanimate nature.

Access to the waterfall is possible from the direction of Uherce Mineralne

Castle in Łańcut

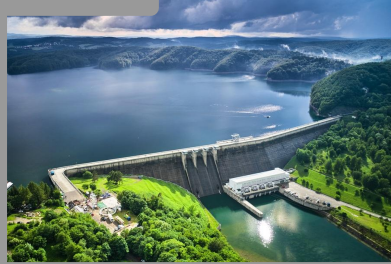

The castle in Łańcut is the pride of a small town with less than twenty thousand inhabitants. It's full of charm and a very interesting place to visit in the Podkarpacie region. Extended in the 17th century from a slightly earlier, typically defensive structure, it now attracts tourists not only with the richness of its collections, but also with stories about legendary ghosts ...

The castle in Łańcut is surrounded by a historic, picturesque park in the English style, in which the attention is drawn to numerous pavilions and farm buildings, once closely related to the everyday life of the residence, and today being museum objects, open to tourists.

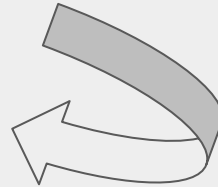

In 1995, the Castle Museum in Łańcut was selected to participate in the UNESCO program "Routes of Castles in Central and Eastern Europe".

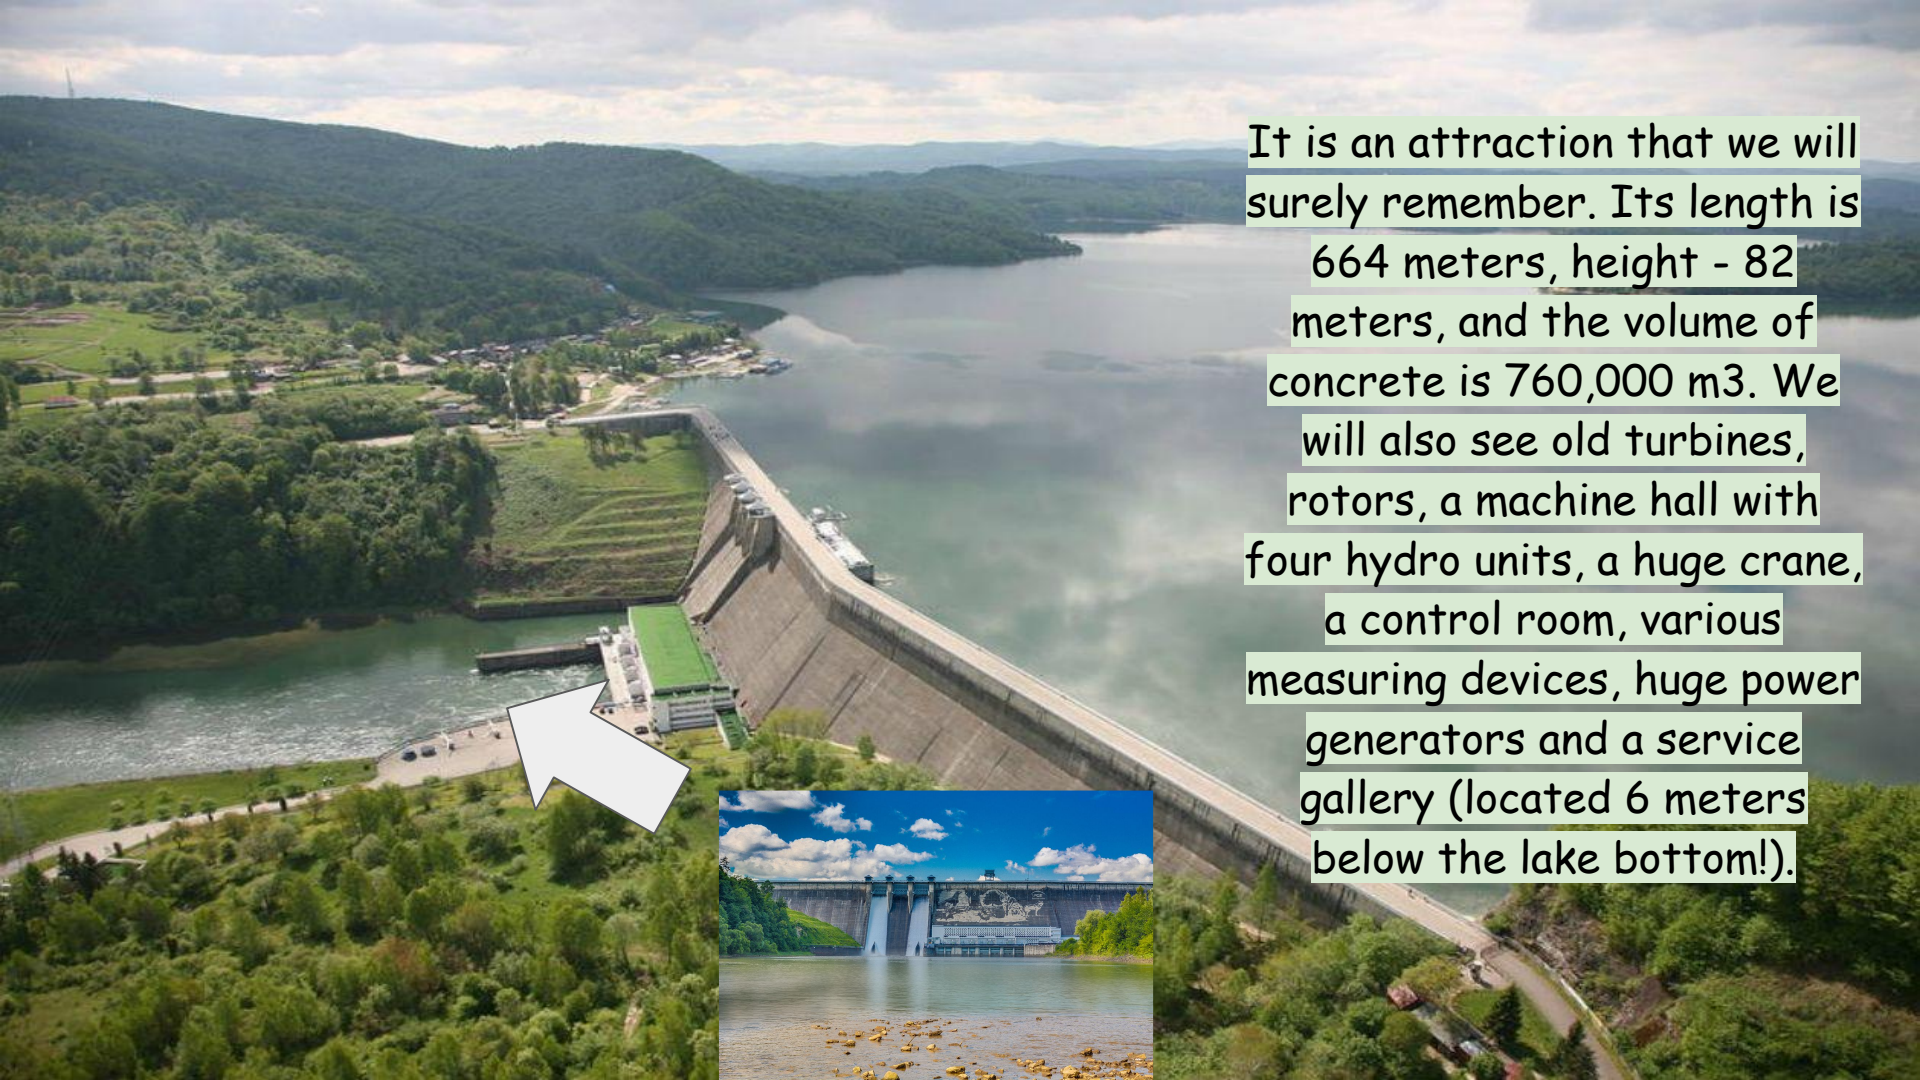

The dam in Solina

In the 1960s, a dam was built on the river San and a dam lake appeared alongside. Today, it is a place with a rich tourist offer, with excellent infrastructure and ready for visitors who willingly conquer the Bieszczady trails and use the entire recreational complex on the river in Solina.

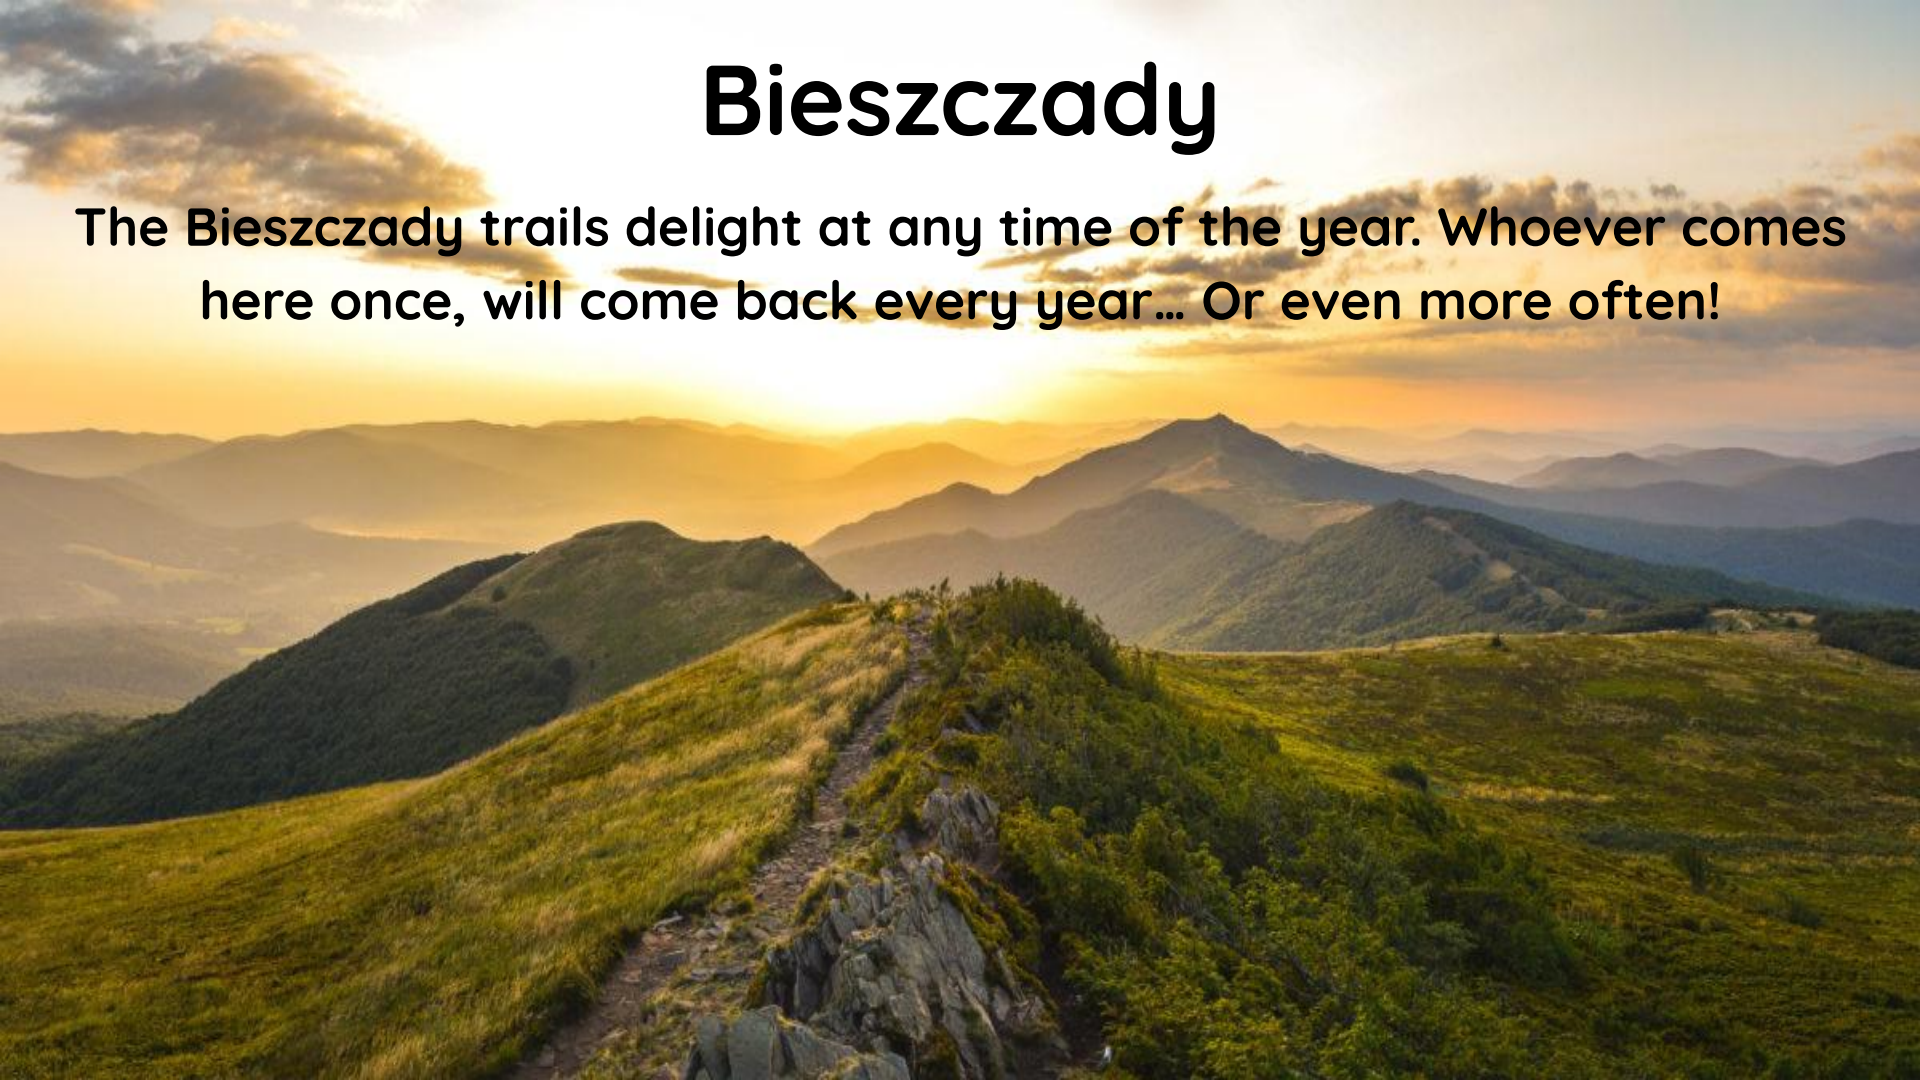

It is an attraction that we will surely remember. Its length is 664 meters, height - 82 meters, and the volume of concrete is 760,000 m³. We will also see old turbines, rotors, a machine hall with four hydro units, a huge crane, a control room, various measuring devices, huge power generators and a service gallery (located 6 meters below the lake bottom!).

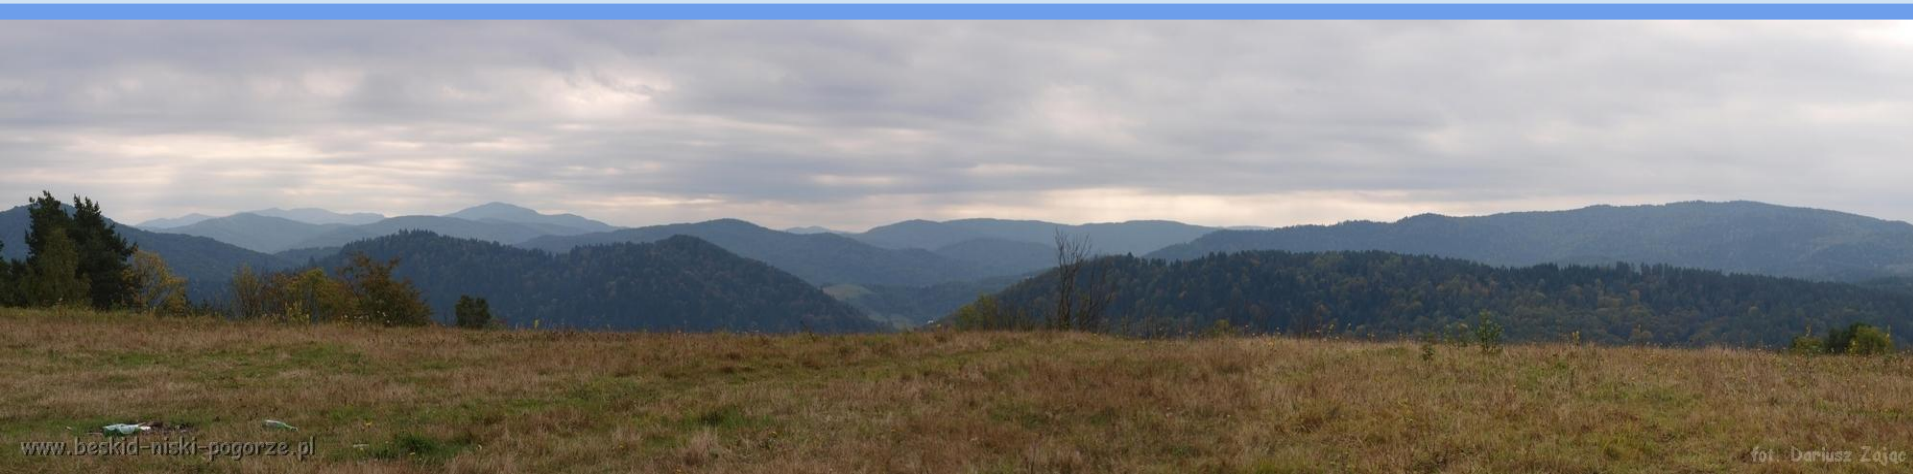

Bieszczady

The Bieszczady trails delight at any time of the year. Whoever comes here once, will come back every year... Or even more often!

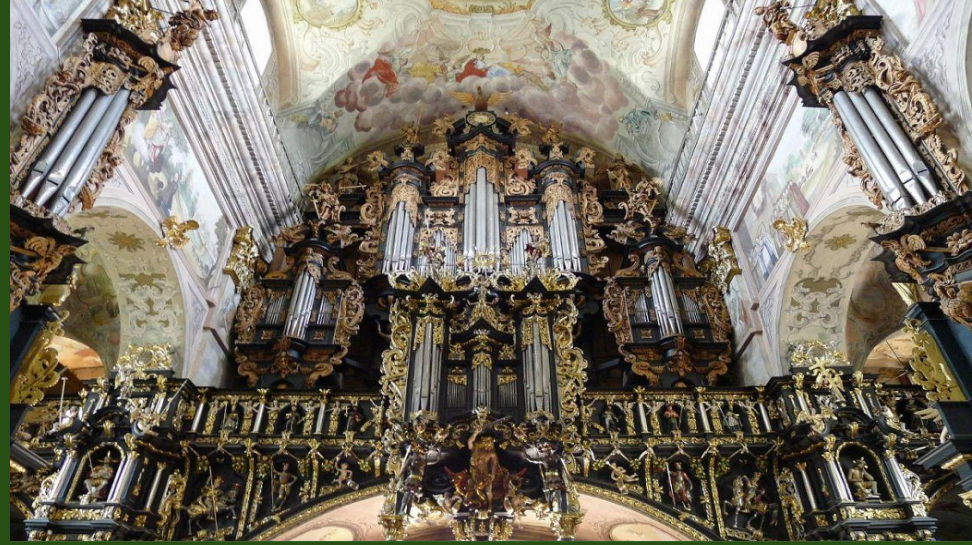

The Bieszczady Mountains are a group of two mountain ranges that form part of the Eastern Carpathians and the most south-eastern end of Poland. The Bieszczady mountain ranges are located between the Łupkowska Pass (640 m above sea level) and the Wyszkw Pass (933 m above sea level), and the highest peak of the Bieszczady Mountains in Poland is Tarnica (1346 m above sea level)

Sanctuary and Monastery of Bernardine Fathers in Leżajsk

The mannerist-baroque complex of the church and monastery of the Bernardine Fathers in Leżajsk is one of the most outstanding works of sacred architecture in the Podkarpacie region. From the mid-seventeenth century, it gained the fame of one of the main centers of Marian cult in this area, which was a significant stimulus of its dynamic development, and thanks to the ability of the local monks to attract talented artists from other centers, as well as wealthy founders, the temple received a rich, unique interior, the elements of which, such as the famous stalls or organs, are manifestations of high craftsmanship not only in the region but also in the entire country.

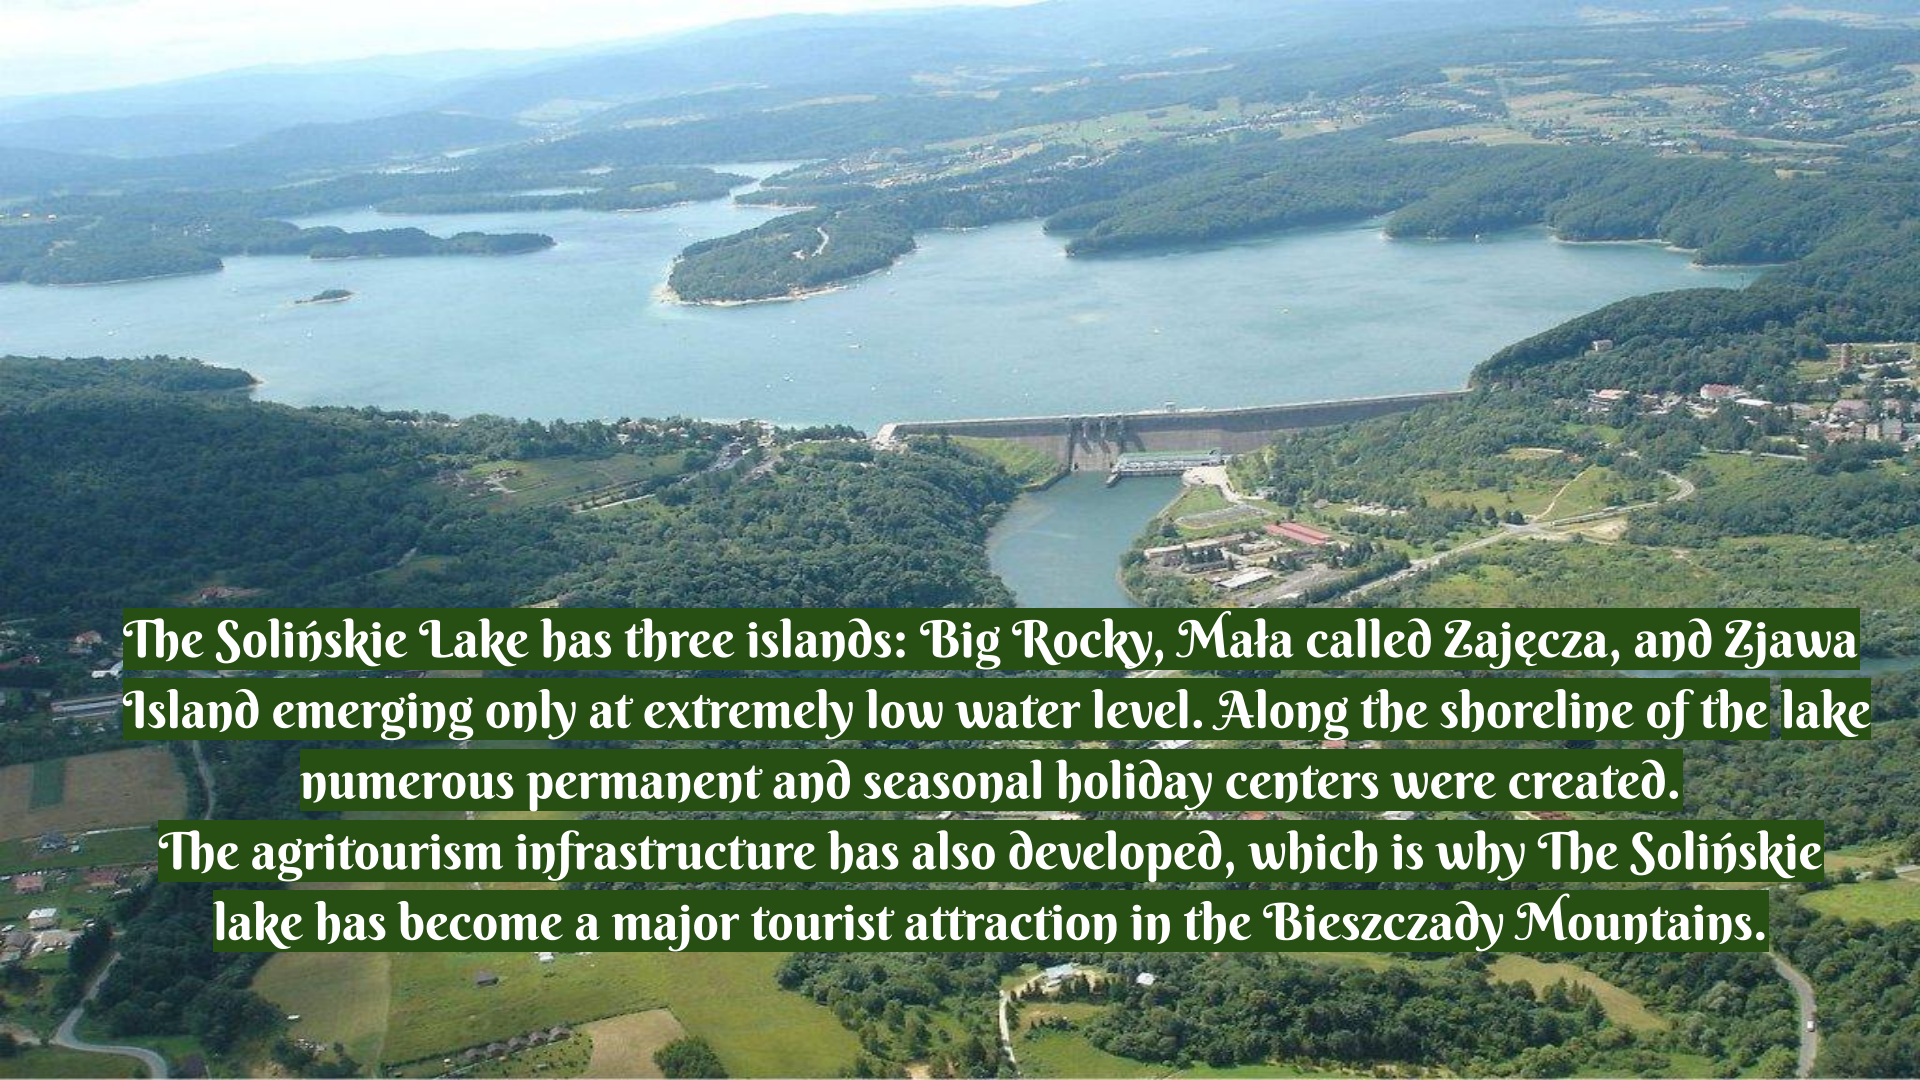

The Ležajsk Basilica of the Annunciation of the Blessed Virgin Mary and the Monastery of the Bernardine Fathers are one of the most important and most valuable monuments of sacred art from the Renaissance and Baroque periods, and a place of frequent pilgrimages and Marian worship.

Solińskie Lake

Solińskie Lake is located to the north-west of the Bieszczady Mountains; it is the largest artificial water retention and energy reservoir in Poland. The lake was created to protect the San Valley from the impending floods. Finally, the reservoir was built in 1968 by damming the waters of San and Solinka.

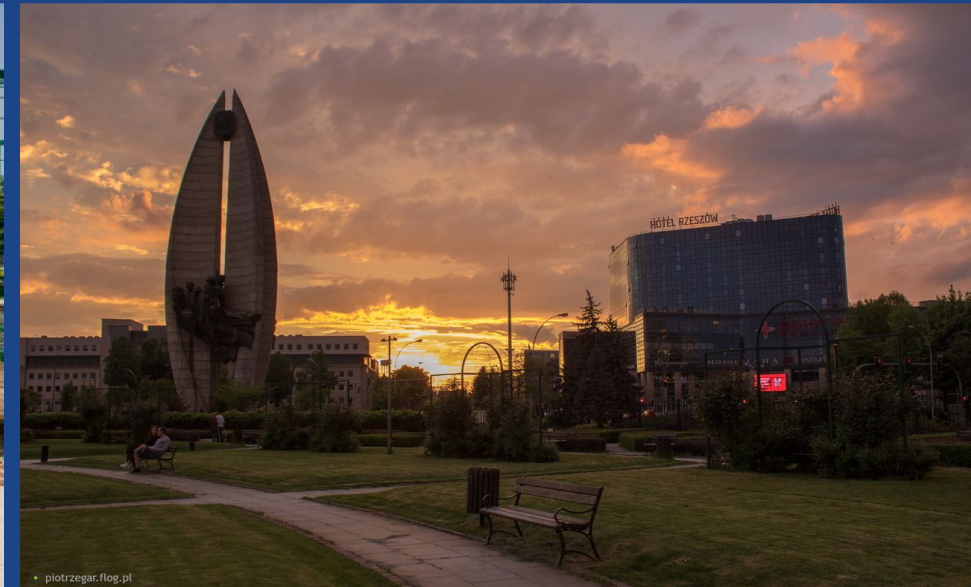

The Solińskie Lake has three islands: Big Rocky, Mała called Zajęcza, and Zjawa Island emerging only at extremely low water level. Along the shoreline of the lake numerous permanent and seasonal holiday centers were created.

The agritourism infrastructure has also developed, which is why The Solińskie lake has become a major tourist attraction in the Bieszczady Mountains.

Bernardine gardens

The Bernardine Gardens are located in the center of Rzeszów. The point of reference was the composition of the area of the Basilica of the Bernardine Fathers. The Bernardine gardens were created on the site of the pre-war church gardens.

The main attraction of the area, which attracts many visitors every day, is the pond and fountain.

The monastery and the Bernardine church were built on the initiative of the castellan, Mikołaj Spytek Ligęza, in the years 1627-29.

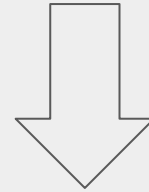

This place is known to all residents of Rzeszów and visitors to the capital of Podkarpacie, because it is located in the city center.

Bolestraszyce Arboretum

It belongs to the valuable monuments of nature and culture of Podkarpacie.

In Bolestraszyce, history and modern times are united, and the historic layout includes a park and a manor, where the outstanding painter Piotr Michałowski lived and worked in the mid-nineteenth century.
